DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 14-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Watanabe et al (EP 0911429 A1).

Watanabe et al discloses forming a crystallization promoter layer while forming a translucent quartz glass layer and the crystallization promoter may be mixed with powdered silicon dioxide ([0013], [0024]), this reads on applicant's transparent coated layer comprises a crystallization promoter dispersed in a silica matrix on a part of the inside of the crucible ([0024]).

Referring to claim 15, Watanabe et al does not disclose the claimed method of obtaining the crucible, which is a product-by-process claim and the patentability determination of a product-by-process claim is based on the patentability of the product and does not depend on its method of production (MPEP 2113). Watanabe et al discloses a crucible, which meets all of the claimed product limitations of claim 15; therefore Watanabe et al reads on claim 15.

Referring to claim 16, Watanabe et al discloses magnesium, strontium, calcium, barium and barium oxide as the crystallization promoter ([0018]).

Art Unit: 1722

Referring to claim 17, Watanabe et al discloses the crucible is used in the pulling up of silicon single crystals ([0011]).
